

## Remy

Hybrid workplaces, managed.

### Rethinking the home office

Remy enables businesses to support employees from anywhere, through onboarding, office gear procurement, inventory management, and waste insight.

### Your company storefront

Remy enables office managers and founders to curate products and set sensible and transparent budgets. Employees get to select and procure their gear in an easier-than-Amazon fashion. Bread built everything from end-to-end.

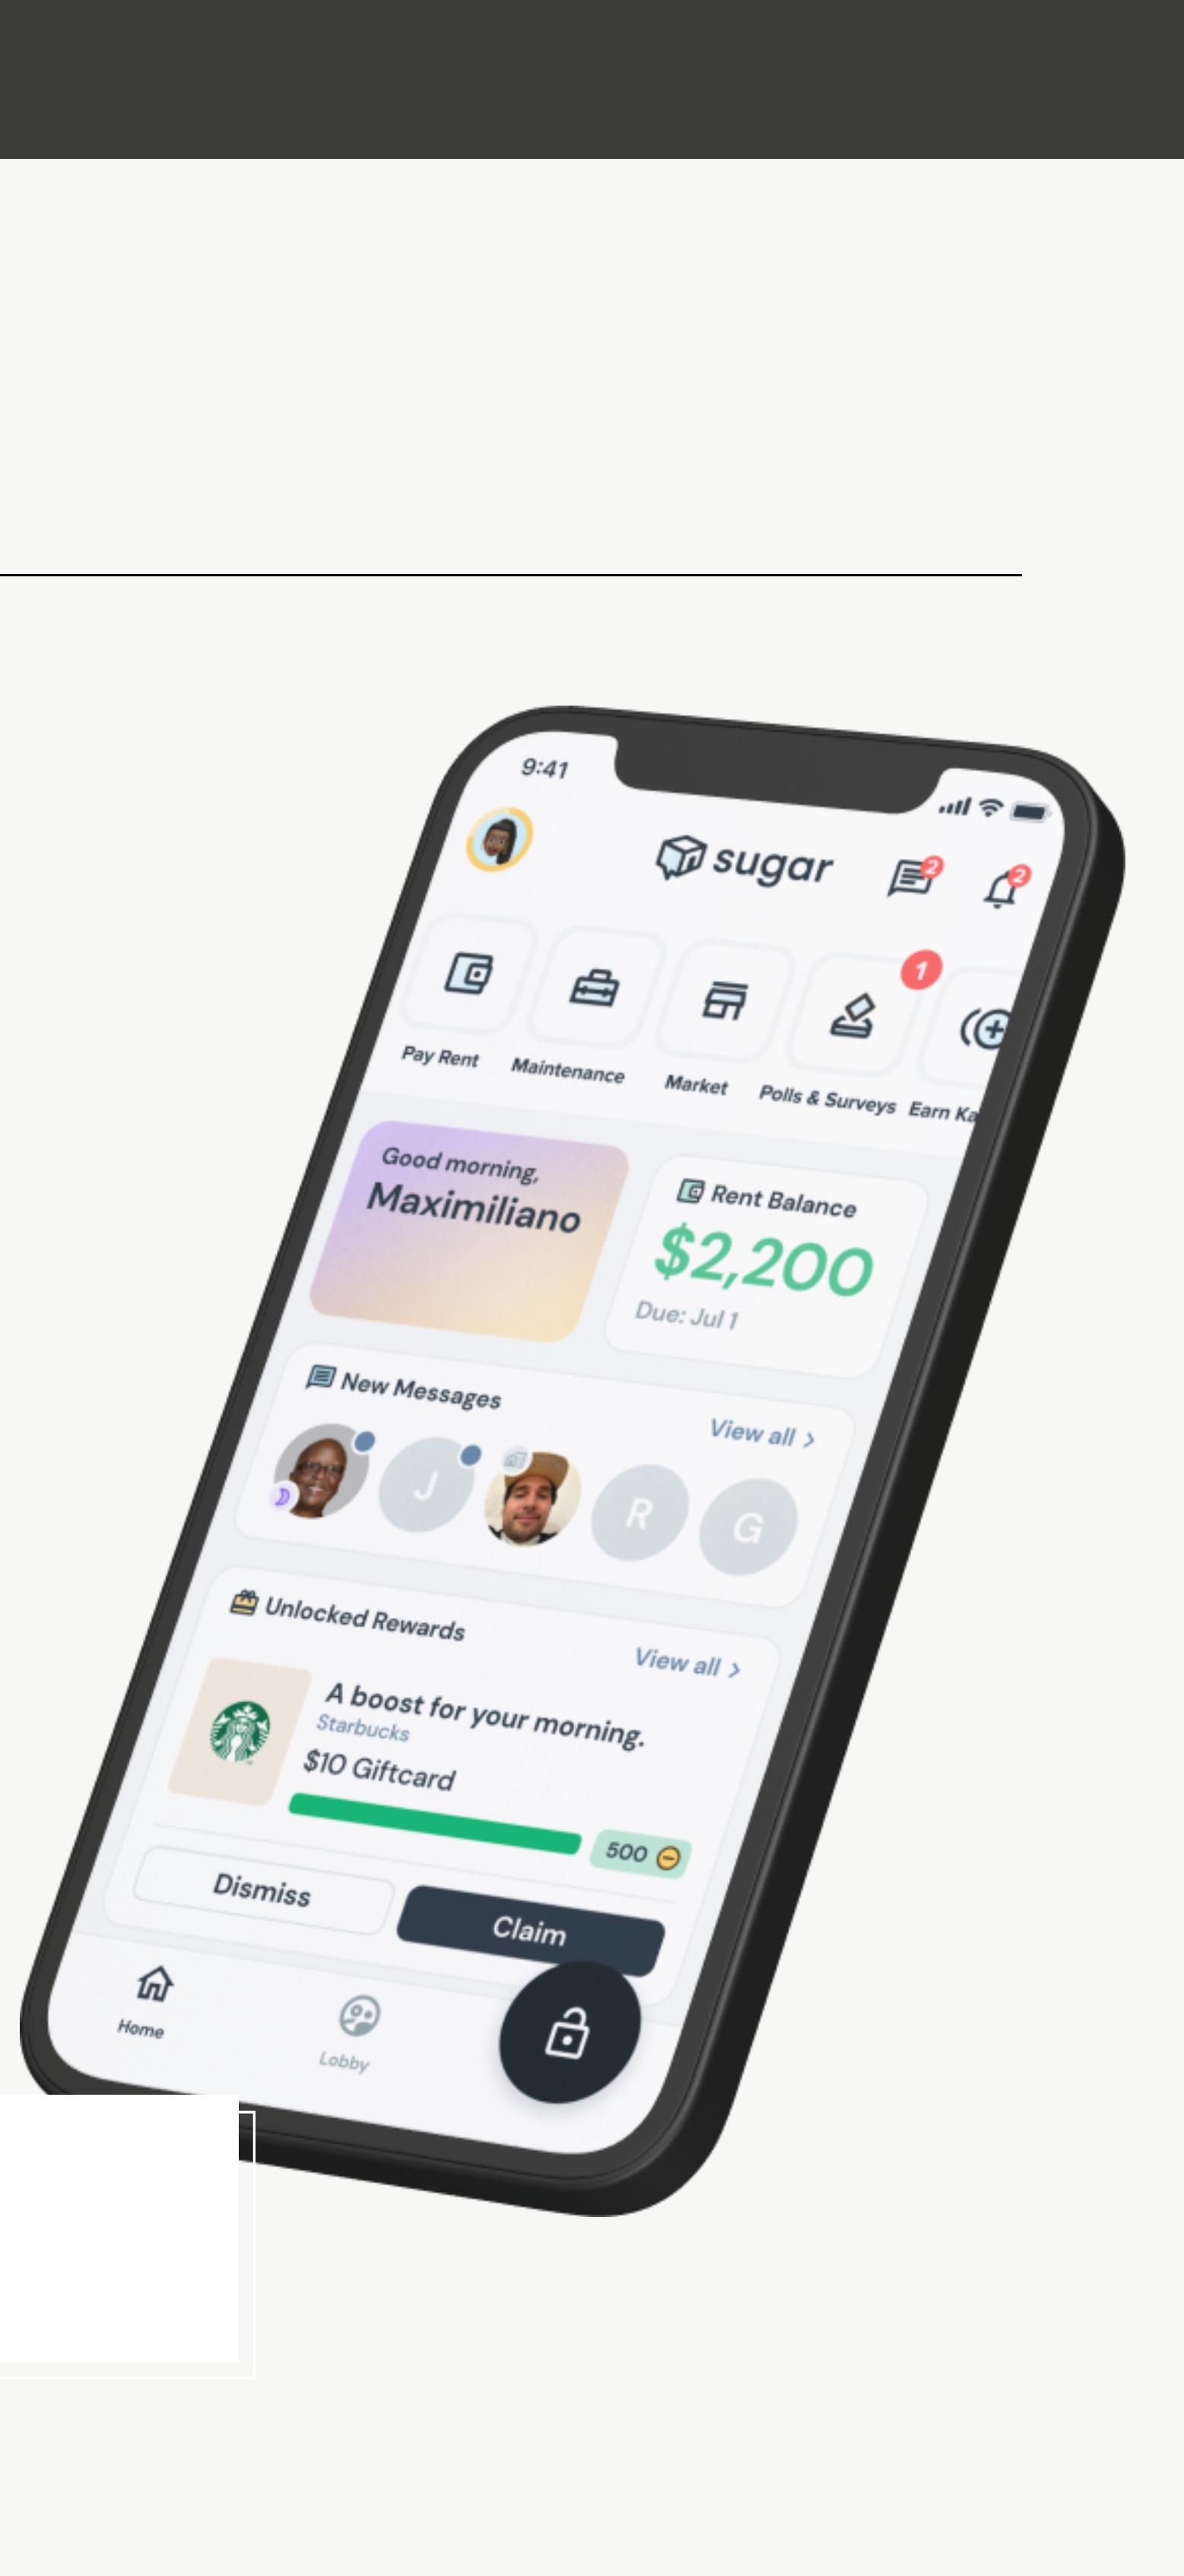

### Tech Overview

#### Engineering

- Full-stack Node.js web application
- HRMS integrations with all leading providers
- Inventory management system including allocation and waste analytics

#### Design

- Visual Identity
- Product Design
- UI Design

## Sugar

Your apartment and amenities at your fingertips.

### Design & Product direction

Even with a thoughtful roadmap, knowing which step to take first is often the most important decision in early product development. In addition to across-the-board product design, we helped Sugar put their best foot forward.

### Engineering

We built their mobile application, property management dashboard, and access control integrations, as well as set the stage for product growth on top of a solid foundation.

### Growth

After building Sugar's early product, we designed and implemented an engineering hiring process, and scaffolded a team of engineers and leadership.

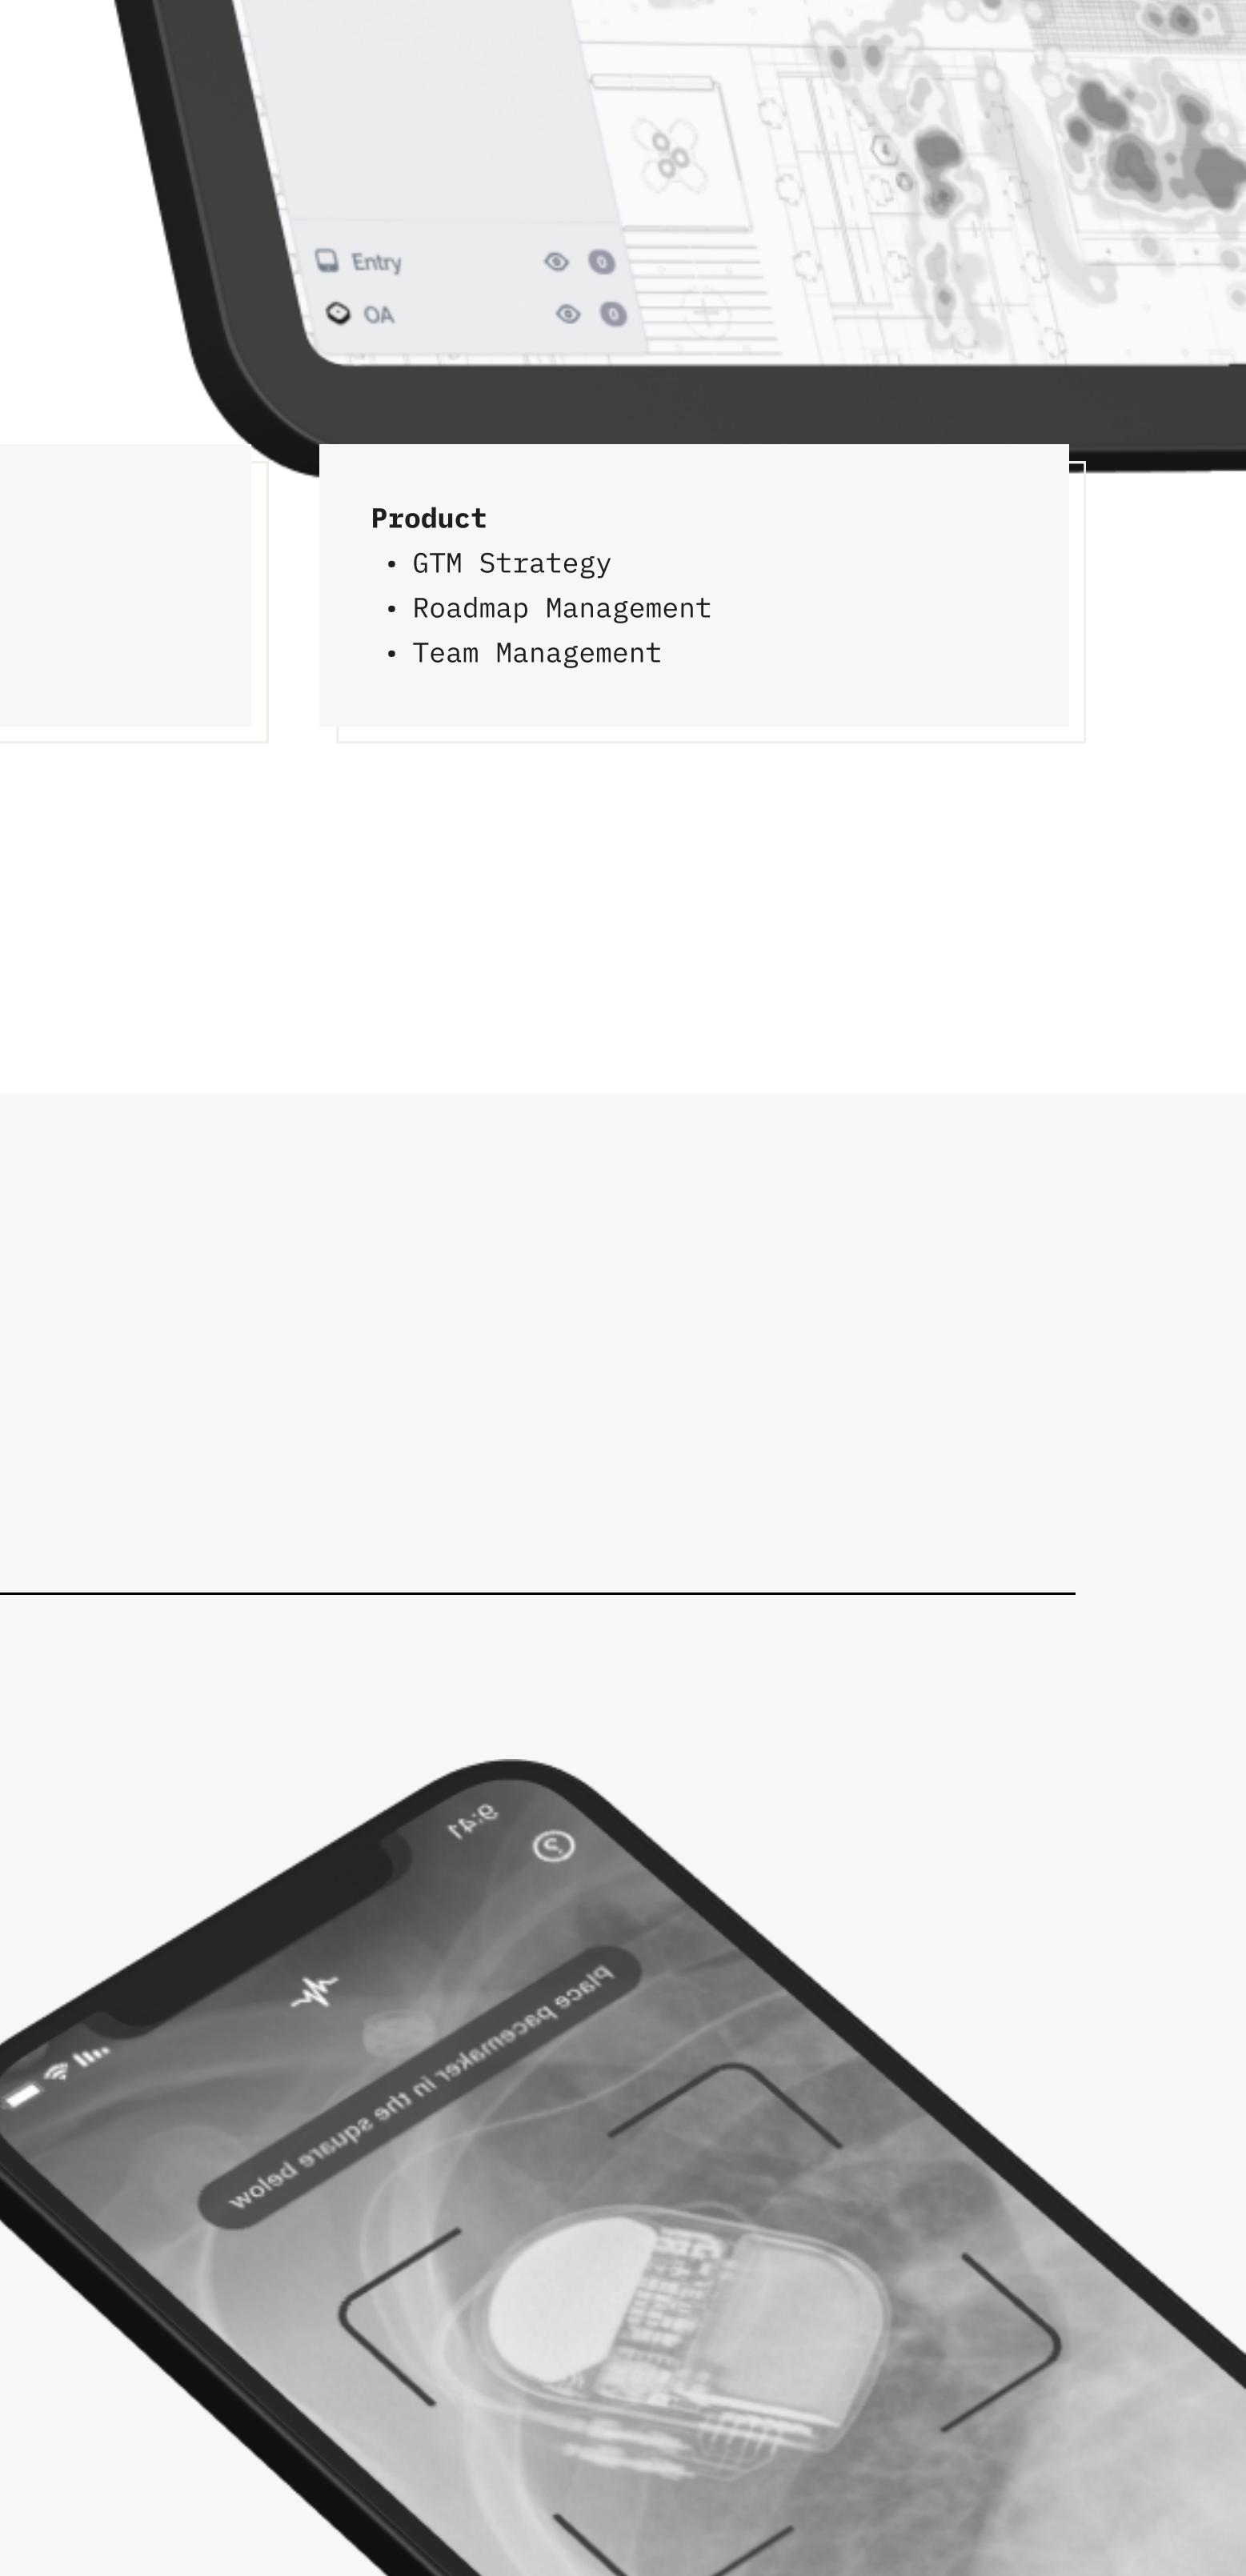

### Tech Overview

#### Engineering

- React-Native
- Next.js
- Django API
- Apache Kafka, Spark data pipelines
- Custom embedded software & OS
- Custom IoT mgmt interface
- Openpath, Entrata, and Klevio

#### Design

- Web Design
- Product Design
- UI Design

## Density

A people count data platform.

### Vertically integrated

Applying anonymous and realtime presence analytics requires a multitude of moving parts working in concert. From algorithms to data pipelines to APIs to dashboards, we helped to build it from end-to-end.

### Millions of data points, every day

Scaling Density meant building pipelines that could ingest high volumes of data, then transforming it into intelligible analytics and beautiful reports.

### Advanced machine learning

There is no dataset for people count using time-of-flight or mmWave radar. We collected, annotated, and trained advanced algorithms to count people, anonymously.

### Tech Overview

#### Engineering

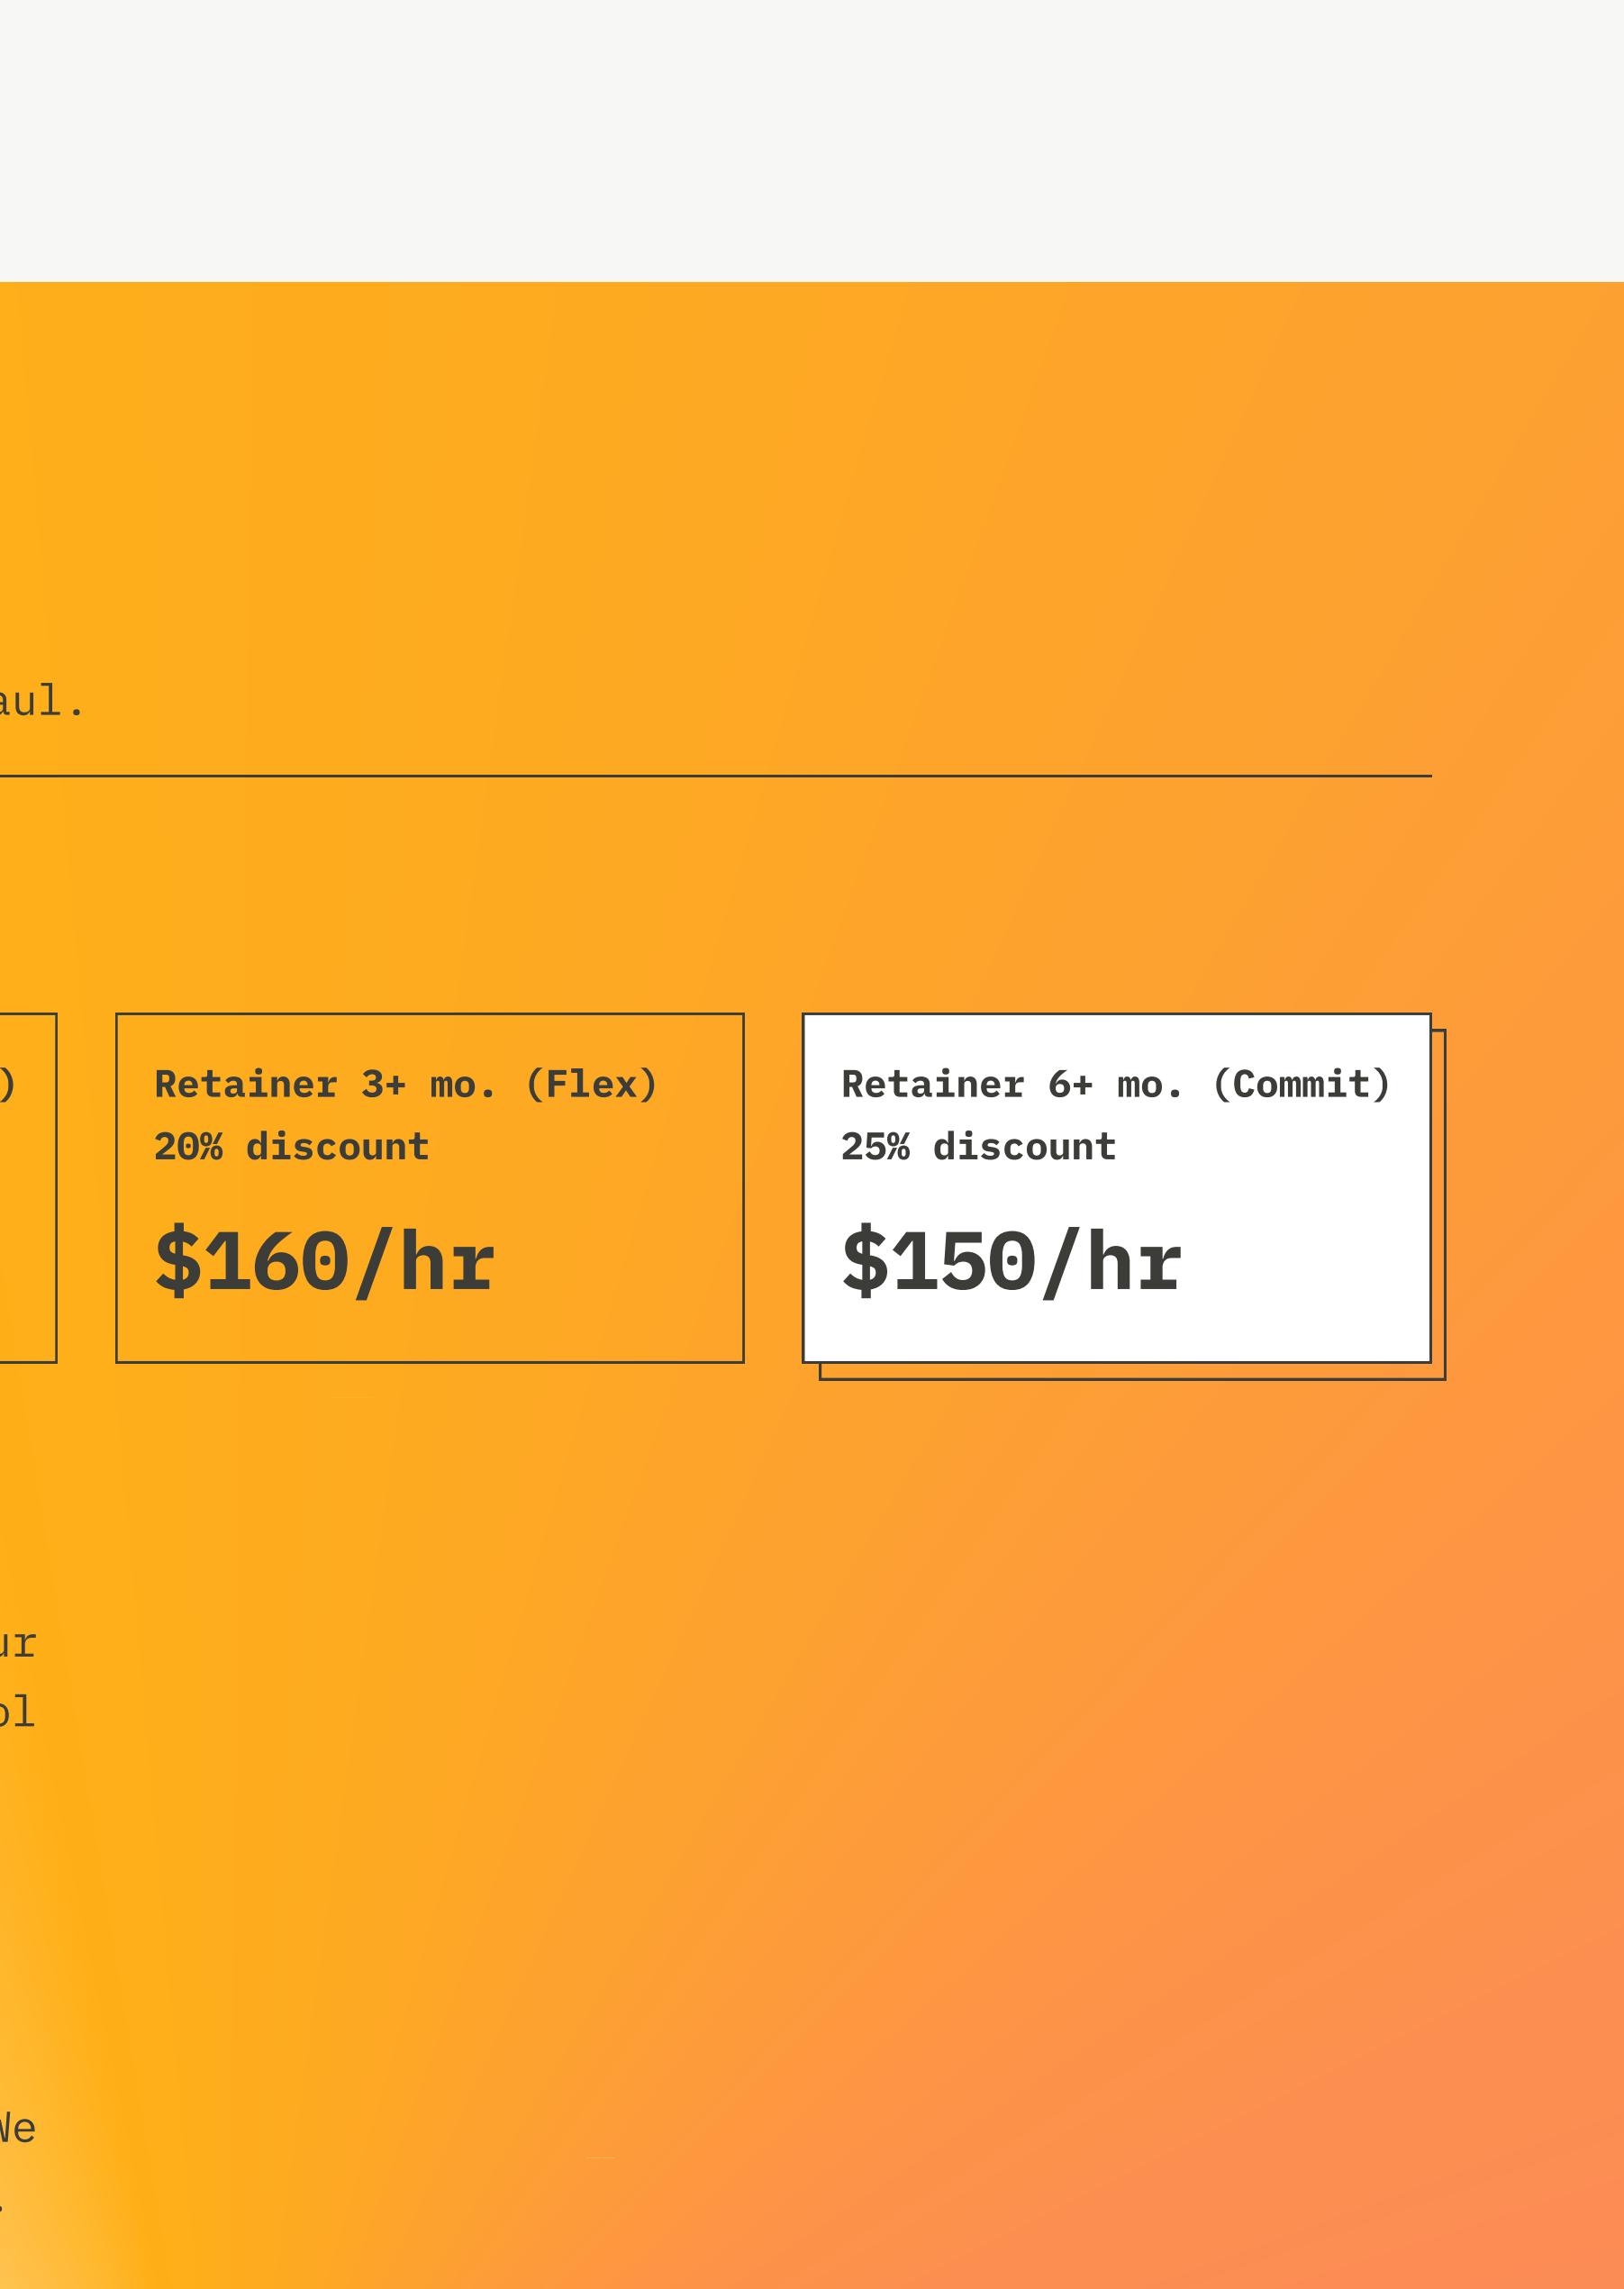

- Mobile app dev (native + react native)
- Deep neural network R&D
- Django API
- Apache Kafka, Spark data pipelines
- Custom embedded software & OS
- Custom IoT mgmt interface
- Hardware eng & test

#### Design

- Industrial Design
- Product Design
- UI Design

#### Product

- GTM Strategy
- Roadmap Management
- Team Management

## PacemakerID

Quickly identify pacemakers and defibrillators in emergency situations.

### Deep Learning Model

Our convolutional neural network was trained on hundreds of thousands of images, and optimized to operate efficiently on a mobile phone.

### Speedy, Simple Interface

Identifying the correct pacemaker/ICD is critical in emergency situations. Great care was placed on speed and ease-of-use.

### It's for science 😊

Published in the Journal of the American College of Cardiology and used by hundreds of thousands of physicians worldwide.

### Tech Overview

#### Engineering

- Tensorflow
- Data Labeling + Annotation
- Python / Flask API
- Native iOS
- Native Android

#### Design

- Visual Identity
- Product Design
- UI Design

#### Product

- Project Bucket (1-2 mo.) 15% discount
- Retainer 3+ mo. (Flex) 20% discount
- Retainer 6+ mo. (Commit) 25% discount

## Structure

Flexibility is inherit. Optimized for the long-haul.

### Base Rate: \$200/hr per person

The 40 hr. Bucket 10% discount

**\$180/hr**

Project Bucket (1-2 mo.) 15% discount

**\$170/hr**

Retainer 3+ mo. (Flex) 20% discount

**\$160/hr**

Retainer 6+ mo. (Commit) 25% discount

**\$150/hr**

### Growing with you

Needs and resources change. We're invested in your long-term success and have a model you can control and predict.

### Founder-led

We're a team of multi-disciplinary experts that have been working together for north of a decade. We have a single rate per resource, for that reason.
